

The background image is a 3D rendering of a modern gaming lounge. It features three large, white, curved armchairs in the foreground. In the background, there are several large digital screens displaying various games and landscapes. The room is illuminated with bright, colorful neon lights in shades of blue, purple, and pink, creating a high-tech, cyberpunk atmosphere. The floor is dark and reflective, and there are various gaming accessories and furniture scattered throughout the space.

GAMING & TECH ROOM DESIGN CATALOG 2026

Dric Interior

DESIGNED TO PLAY

Gaming & Tech Room Collection

The modern home has room for more than rest — it has room for immersion. A space built to disappear into, without sacrificing design.

At Dric Interior, we approach gaming and tech rooms with the same discipline as any other space: considered layouts, cable management built into the design, and finishes that hold up to hours of use without losing their edge.

Made in Nigeria to international standards, and backed by our guarantee — built for performance, and built to last.

Explore the collection.

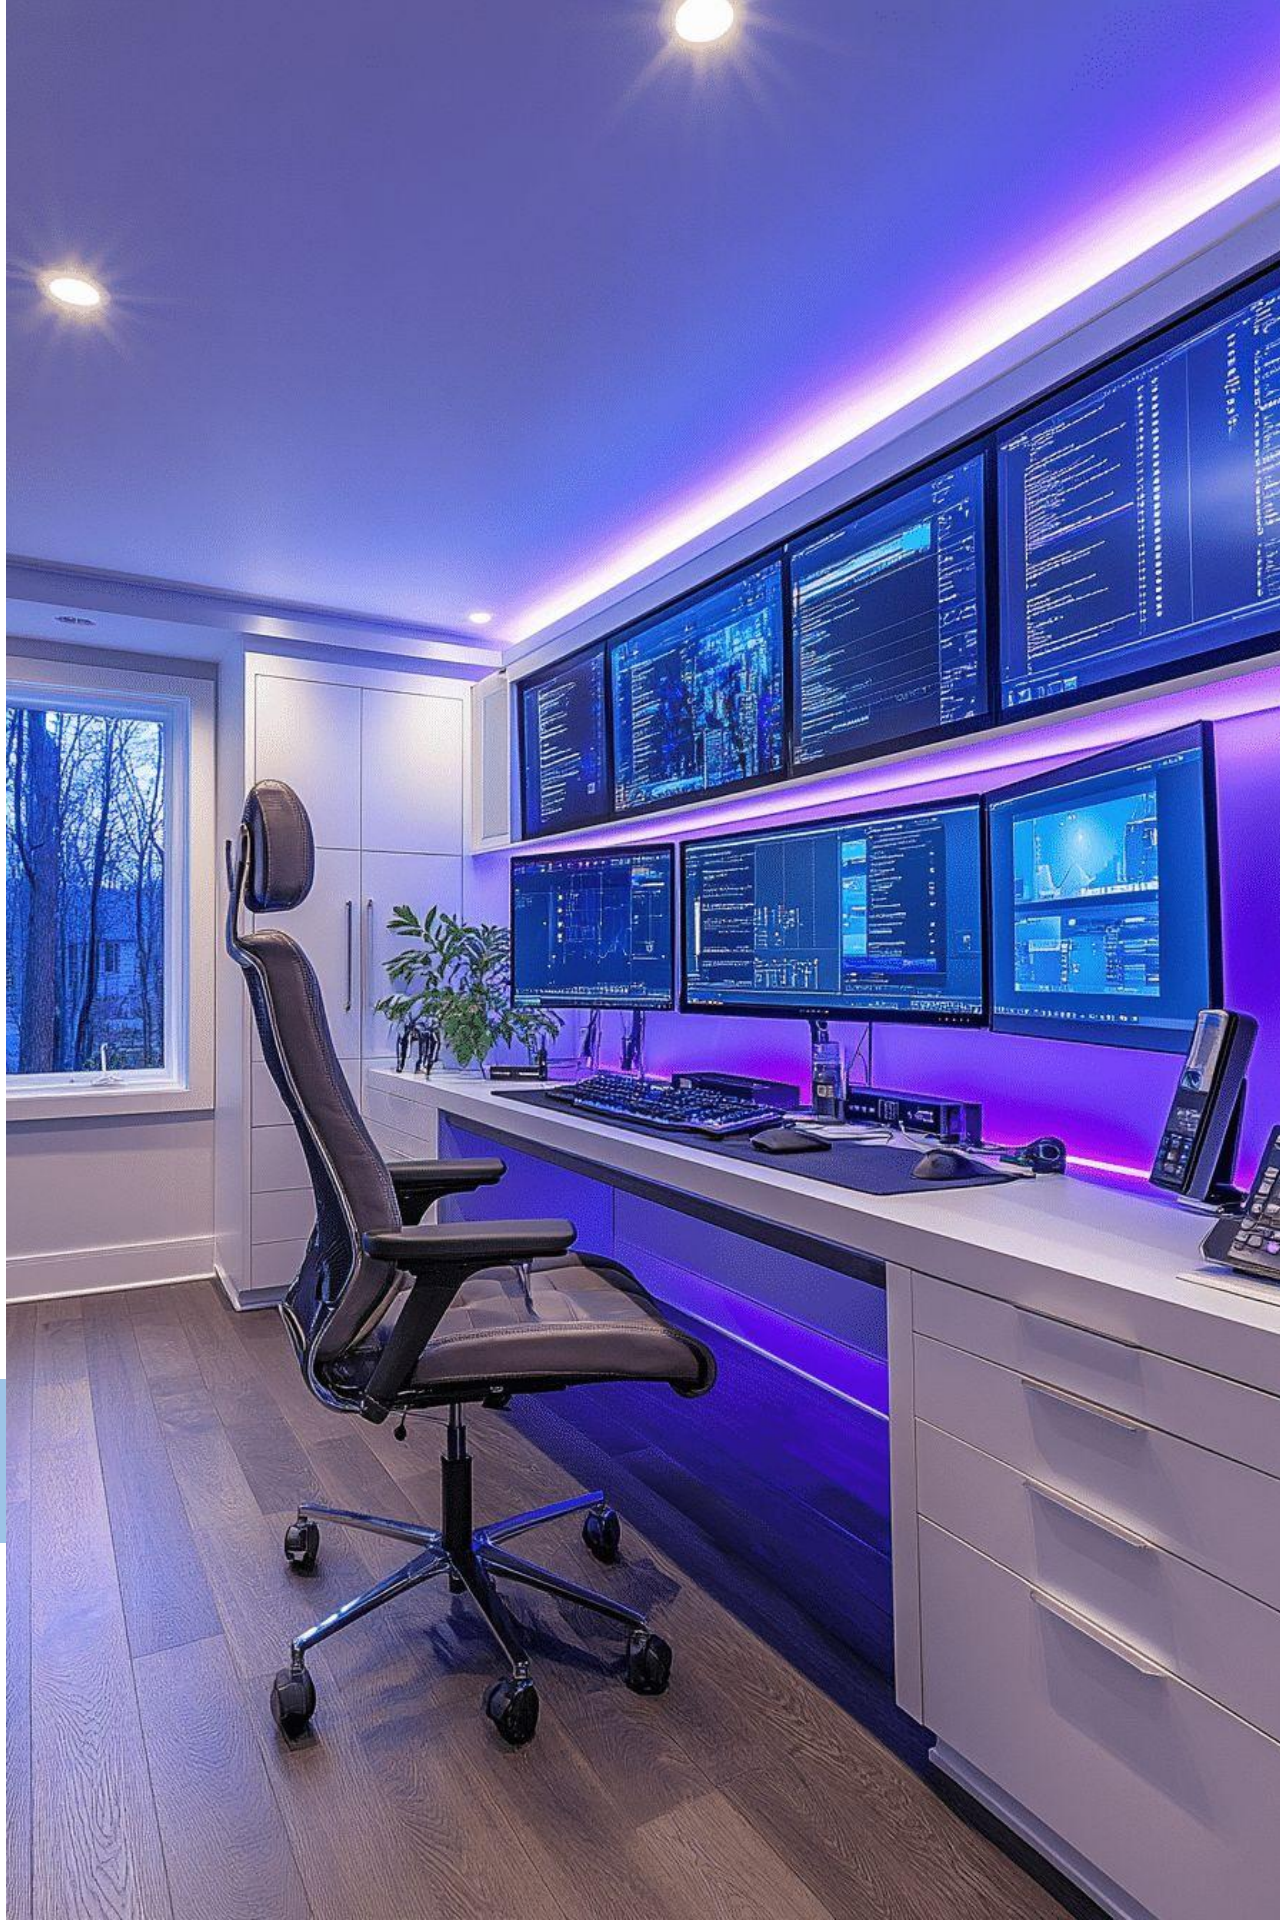

Every setup in this collection can be tailored in dimension, finish, hardware, accessories and material to suit your space.
